

Connected Care. Safer Futures.

Connected medical devices and a compliance-first monitoring platform for maternal and clinic-to-home care — built for Canadian clinics.

• Canadian data residency

• Compliance-first architecture

• OEM-agnostic integration

• FHIR/HL7 interoperability

• Explainable clinical rules

• Clinic-first deployment

NovaMama™

Maternal remote-monitoring kit

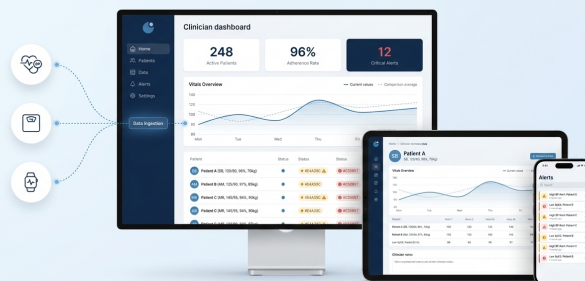

For: pregnant & postpartum patients

Use: remote blood pressure, heart rate & weight monitoring

- Includes BP monitor, pulse oximeter, weight scale, NovaMama app, patient guide & carry case
- Designed to support early detection of preeclampsia & other complications, with fewer clinic visits
- Clinic-first enrolment; patient self-setup

NovaHub™ Care+

Clinician dashboard & data platform

- Secure device & patient data ingestion
- Configurable clinical rules & alerts; real-time vitals and history
- FHIR/HL7 EMR integration; Canadian data residency; fits existing clinic workflow
- Implementation, role-based training, EMR setup, analytics & ongoing support

NovaPatch™ Vital

Continuous wearable - in development

- Continuous vitals wearable sensor
- Post-validation product — not yet available
- Pathway: Validation → Regulatory → Launch clearance
- Pricing confirmed at launch

HOW IT WORKS

- 1 Patient & devices**
NovaMama / NovaPatch capture vitals at home
- 2 NovaHub Care**
Secure monitoring, clinical rules & alerts
- 3 Clinical team**
Review in clinic EMR & patient records

INVESTMENT

NovaMama Kit + App	\$45–60 / patient / mo
Kit logistics	\$10 / patient / mo
NovaHub Care platform	\$5,000 / clinic / yr
Implementation & training	\$2,000 / site • one-time
EMR integration & setup	\$6,000 / site • one-time
Analytics & outcomes	\$400 / site / mo
Early-site planning ≈ \$55–60 / patient / mo over a 6-month maternal cycle.	

COMPLIANCE

NovaMed devices and software are intended for clinical use by qualified professionals and are not a substitute for professional medical advice, diagnosis, or treatment. All patient-facing claims are subject to regulatory clearance and validation.

Encrypted & resident in Canada
